SignalHire extension for Zoho Recruit

SignalHire browser extension (available in Chrome and Firefox web stores) is integrated with Zoho Recruit now!

The extension allows you to enrich candidate profiles with their direct emails and phone numbers and export them from LinkedIn, Facebook, Twitter, or GitHub directly to your Zoho Recruit account.

Once the extension installed and connected to your Zoho Recruit account, you can instantly find contact info for a candidate and then export candidate profile with found contacts. The profile will be automatically created and matched with your existing fields in Zoho account. No need to manually create and copy & paste info anymore!

The extension works with Chrome and Firefox browsers.
